

Health Services District Questionnaire Content

This is a list of the major topics covered in the district-level health services questionnaire. For more detailed information on the content of the study questionnaires, please visit the project web page at www.rti.org/shpps.

- district required health services offered to students
- parent or guardian consent requirements for providing health services to students
- information schools keep in student records about health topics or issues
- immunizations or vaccinations required before entering school
- documentation required for students to self-medicate
- district policies on students and faculty who have HIV or AIDS
- district policies on student injuries or illnesses that occur at school
- required health screenings schools conduct for students
- staff development provided to school nurses or other school health services staff
- collaboration between district health services staff and community agencies on school health services projects
- district contracts or other arrangements with non-school based organizations to provide health services to students
- credentials that school nurses or other school health services staff are required to have
